PROJECTS

College Website Attendance Form Creation

- Created an attendance form for a college website. Implemented user-friendly interface for easy access. Ensured data validation for accurate attendance records.

Phone number tracking using Python

- Developed a Python utility that monitored and analyzed phone numbers by way of validation and parsing of data such as country, carrier, and region via the `phonenumbers` library with the addition of geolocation APIs to map the location of phone numbers correctly.

Voice Assistant using Python

- I developed a Python voice assistant that performs tasks on voice commands with SpeechRecognition, pyttsx3, and PyAudio for voice operations.
- I also used APIs for real-time tasks such as weather information, Wikipedia search, and reminders.
